

# USE CASE: CORPORATE CONGLOMERATE

## Simplifying Multi-Domain IAM: A Case of Resilient Data Backup and Compliance

### Company Profile

A multinational conglomerate, encountered several challenges in managing its Identity and Access Management (IAM) across its diverse portfolio of companies. Each company within the group had its unique domain, leading to complexities in IAM administration.

### Challenges:

- 1. Multi-Domain Complexity:** The IAM system had to accommodate users with different email domains, creating complexities in user management and access control.
- 2. Data Backup and Recovery Needs:** With critical data spread across various systems, the need for a reliable backup and recovery solution was imperative.
- 3. Compliance and Security:** Ensuring compliance with various regulatory standards and maintaining high security for sensitive data was a priority.

## Acsense Solution:

- 1. Continuous Backups:** Acsense's IAM Resilience Platform offered continuous backups of their IAM configurations, including user data across multiple domains. This feature solved their need for reliable data backup and granular recovery options, ensuring no data loss in case of system failures or errors.
- 2. Point-in-Time Investigation:** The platform's point-in-time functionality allowed them to compare different points in time within their IAM systems. This feature was crucial for managing changes across multiple domains and ensuring that any modifications did not disrupt the continuity of operations.
- 3. ZT & Compliance:** Acsense's advanced encryption and security policies ensured that they met all compliance requirements effortlessly. This was particularly beneficial for the conglomerate, which had to adhere to various regulatory standards due to its global presence and diverse business nature.

## About:

Acsense is a cutting-edge easy to use IAM resilience platform that caters to both workforce and customer IAM requirements with a unified solution. Our platform boasts one-click recovery, continuous data verification, routine testing, and the ability to detect alterations between Points in Time, fortifying the resilience of your IAM system. Acsense is backed by Joule Ventures, Gefen Capital, Fusion and independent investors.
